Hi

- Full stack developer for >7yrs
- Founder and CTO
- ex Amazon SDE
- Passionate about coding and building impactful startups.

I AM **notJust**  
//developer

@VadimNotJustDev

## Prerequisites

1. Asset Bundle (dummy data, images, icons, PDF presentation, unlimited karma):

<https://assets.notjust.dev/authentication>

2. React Native environment setup

<https://reactnative.dev/docs/environment-setup>

# notJust

//development

## Let's get started

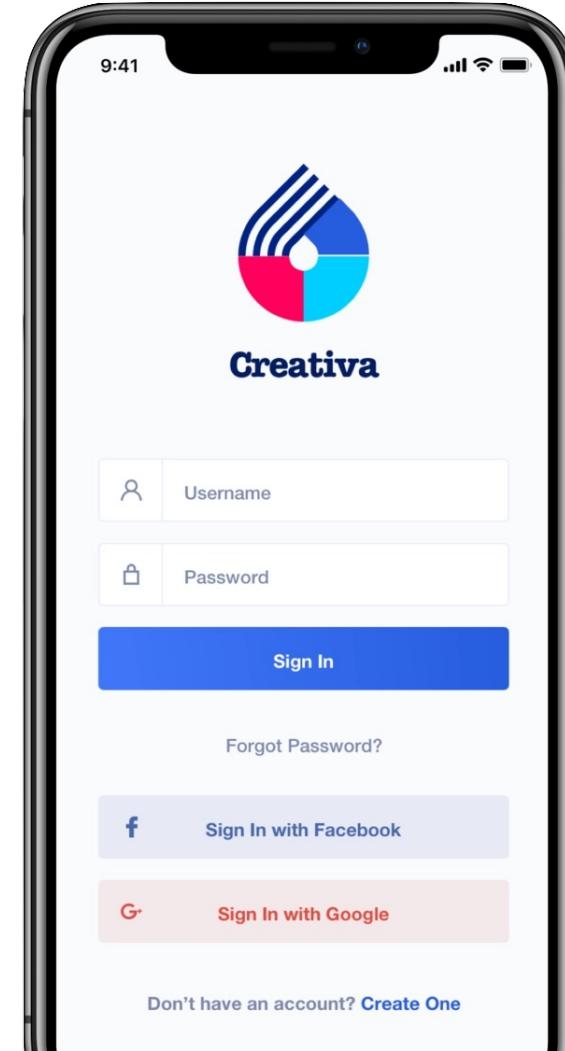

## Initialise a new React Native Project

1. `npx react-native init Authentication`
2. Open the project in your editor
3. Open the project folder in a terminal
4. Start development server  
`npm start`
5. In a new terminal, run the app on emulator  
`npm start android or npm start ios`
